LILIENTHAL BERLIN

准备好迎接阳光明媚的日子！

READY FOR SUNNY DAYS!

视线清晰，造型出众

光线是明是暗？是周五的夜晚还是周一的早晨？您的新款太阳镜将柏林设计与意大利品质相融合，让这一切都变得不再要紧。无论光影交错，还是场景变换，您都可以获得清晰的视线。阅读这份指南，了解如何保养您的新太阳镜。

SEE BETTER. LOOK BETTER

Light? Dark? Friday night or Monday morning? It no longer matters when your new sunglasses combine Berlin design with Italian quality. They let you see better in all lighting conditions and look great in any situation. Read this guide to find out what you need to do to keep it that way.

对眼睛有利

蔡司镜片的紫外线防护系数达到 400，可以吸收 100% 的有害紫外线辐射。根据色调水平，它们被划分到类别 3 范围，也就是说无论艳阳当空，流连于沙滩或者跋涉于山林，您都可以安心地佩戴这款太阳镜。正式的 CE 标签表明这款太阳镜符合欧盟的所有相关要求。

GOOD FOR THE EYES

The Zeiss lenses have a UV protection factor of 400 and absorb 100% of harmful UV radiation. Their tint level puts them in category 3, which means you can wear them in bright sunlight, on the beach or in the mountains without any worries. The official CE label guarantees that the sunglasses meet all requirements from the EU.

请注意！

佩戴这款新太阳镜时，切勿直视太阳。如果您想躺在日光浴床上享受阳光，需要为您的双眼提供额外的防护。我们的太阳镜也并非用于防范机械危险。如果您计划前往沙漠、高峰或冰川，我们建议您选择色调水平更高的太阳镜。

ATTENTION, PLEASE!

You should never look directly into the sun with your new sunglasses. If you wish to visit a sunbed, you'll need additional special protection for your eyes. Our sunglasses aren't built to protect you from mechanical hazards either. If you're planning trips to the desert, mountain summits or glacier expeditions, we also recommend sunglasses with a higher tint level.

易于清洁

利用专用的眼镜清洁布，可以很快擦干净镜片。用少量温水和温和的洗手液可以清洁镜框。但是，不要使用含酒精的清洁布和洗涤剂。这些会对用于制造眼镜的有机材料的表层造成损害。

EASY TO CLEAN

The lenses will be spotless in no time with a classic glasses cleaning cloth. You can clean the frame with a little lukewarm water and gentle hand soap. However, do not use cleaning cloths or detergents that contain alcohol. This can damage the surfaces of the organic materials used to make the eyewear.
