

## 调节表带的长度

您的新金属表带需要调节长度吗？珠宝商或腕表经销商都拥有相应的工具，可以快速为您调节表带至理想的长度。如果表带过短，请告知我们。我们很乐意为您添加更多链节！

您也可以自行调整表带的长度。但敬请注意：如果在此过程中表带破损，恕不涵盖于我们的质保范围内。

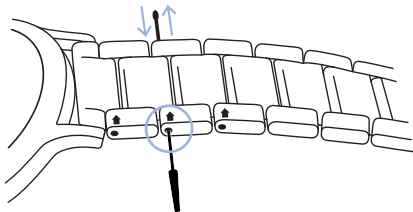

如果您想自行调整：选择长尖头工具，用力将箭头所标示的链节中的连接销推出。然后移除或添加新的链节，直到调整至合适的长度。使用先前移除的一个连接销来固定表带。连接销较宽的一头应该位于尖头对面一侧的孔中。

## ADJUSTING THE RIGHT LENGTH

Need to change the length of your new metal strap? Every jeweler or watch dealer has the right tools and can make the strap fit perfectly in no time at all. If it is too short, just tell us. We would be happy to send you more links!

You can also adjust the length of the strap by yourself. But take note: If the strap is damaged in the process, it is not covered in our guarantee.

If you want to do it yourself: With a long, pointed tool and some force, push the pin out of a link marked with an arrow. Now you can remove the links or add new ones until it is the right length for your wrist. To close the strap, use one of the pins that was removed earlier. The wider end of the pin must be placed in the hole opposite the arrow.
